Email

libby@libbychapman.com

Location

Oxford, Oxfordshire

Hello! I'm a 38 year old web professional who has recently relocated to Oxford from Melbourne, Australia. I'm an experienced front end developer (HTML/CSS/JavaScript and more) and a qualified graphic designer. Now that I've settled in to my new home town I'm looking for employment, so please contact me if you think we might work well together.

Education

RMIT

2004-2006

Graduate Diploma in Graphic Design

Subjects: **New Media Technology & Process** (High Distinction), **Professional Practice** (High Distinction), **Information and Interface** (High Distinction), **Type and Identity** (High Distinction), **Graphic Design Process** (High Distinction), **Promotion Design** (High Distinction), **Publication Design** (High Distinction), **Contextual Studies** (Distinction).

Work selected for exhibition in the annual student showcase.

Monash University

2001-2004

Bachelor of Science

Graduated with first class honours.

Deans List scholar.

Accepted into PhD candidature, awarded APA scholarship.

Ongoing

Keeping my skills up-to-date is an ongoing priority for me. I use a mixture of online learning (I have recently completed courses on AngularJS, Node and MongoDB at Code School) and attending conferences and meetups (Smashing Conference 2014, Oxford UX meetup group).

Experience

SIMB

2006-2015

Director

RESPONSIBILITIES: FRONT END DEVELOPMENT, GRAPHIC DESIGN

My husband and I ran a small web development business for a number of years before we moved to the UK. We worked directly with clients to gather requirements, produce specifications, design, build and deploy websites and mobile applications. We also worked with a number of creative agencies to build the designs they supplied us. My responsibilities were varied, and included:

- **Responsive web development.** I used creative documents as provided (PSD, PDF, Illustrator or even InDesign format depending on the agency) to produce websites that work on all screen sizes from desktop to phones, checking for cross browser compatibility.
Depending on the requirements of the project, I have used HTML, CSS (including Flexbox), JavaScript, JQuery, and Less (CSS pre-processor) to create these sites.
- **EDMs.** I have created email campaigns using MailChimp and Campaign Monitor.
- **Graphic Design.** I have designed for print applications (business cards, stationery, signage) as well as websites and mobile applications.
